Covid-19 Update

To all patients and families of NSAA,

As you may have heard, the Center for Disease Control just announced that fully vaccinated individuals no longer need to wear a mask or practice social distancing.

While we are happy to hear that life is starting to return to some degree of normal, we want to make clear that our current mitigation strategies remain in place. As this is a health care setting, **all patients, family members and staff will continue to be required to wear a mask while in our office regardless of vaccination status.**

We will await further guidance from the Lake County Health Department and the Illinois Department of Public Health.

We appreciate your understanding as we try to keep everyone safe and healthy.
